

## **Worm Management with Central Lakes Equine**

At Central Lakes Equine we are passionate about preventing resistance in the New Zealand worm population. Incorrect use of wormers had led to wide-spread resistance in most of the worm species our horses carry. As a result of our concerns, we provide a COMPLIMENTARY worm management plan for our clients and anyone else around the country who needs our help.

All you need to do is submit a sample of your horses' poo for egg count analysis. Please note there is a charge for the Faecal Egg Count Laboratory service. The cost is \$30 and a discounted total price of \$20.70 for our local clients.

We will then provide you with a horse specific management plan FREE of charge.

### **Sample Submission**

We need ONE nugget of poo in a zip lock bag.  
Please freeze the sample overnight.  
Courier to us the next day; no ice pack needed.

### **Postal Address**

Central Lakes Equine  
2 Glencarron Street  
Alexandra  
9320

### **Please provide the following information with the faeces or via email**

Horse Name:  
Client Name:  
Age of horse:  
Any current veterinary medical history?  
How long has the horse been in your care?

### **Worming/Egg counts:**

When was the horse last wormed?  
And what was the worming product?  
When did the horse last have a faecal egg count?  
And what was the result?  
Do you have any more worming or egg count history?

### **Paddock management:**

Do you poo pick?  
How often?  
Do you harrow?  
How long do you rest the paddock post harrowing?  
Are the paddocks cross grazed with other animals?  
How often does your horse go off property/stay away from home?

Take the guess work out of worming!
